

QUADRANT PILOT

Airline Pilot Standards Multi Crew Cooperation Course (APS MCC)

Quadrant Pilot's enhanced Airline Pilot Standards Multi Crew Cooperation Course is the perfect first step towards a professional career in commercial aviation. The course has been designed to help pilots achieve the highest standard of knowledge, skills and attitudes required by Commercial Air Transport Operators.

The APS MCC course is structured and designed to facilitate a step by step approach to training. Using our A320 and B737 NG Level D Full Flight Simulators Pilots can experience the difference when training in the same environment as Professional Pilots undergoing Type Rating, Licence Proficiency Checks (LPCs) and Line Oriented Evaluation training (LOE).

Quadrant Pilot will be conducting all the Simulator sessions in Full Flight Simulators. This will ease the upward transition to becoming fully Type Rated on either the A320 or B737 NG.

**Simulator Sessions on A320
or B737 NG in house Full
Flight Simulators**

Course Schedule

- Ground School Training – 4 Days (32 Hours)
- Practical Advanced Flight Training in Full Flight Simulators – 40 Hours (10 Days)
- For Holders of Integrated Airline Transport Pilot Licence (ATPL) the Simulator phase is reduced to 35 Hours

Quadrant Pilot, UK CAA/EASA Approved Training Organisation offers a suite of Pilot Training services, as well as Dry Lease on A320 and B737 NG Level D Full Flight Simulators at our training centre near London Gatwick, UK.
